

Introduction

In my analysis and visualization I focus on two things the most popular dogs and dogs breed & what most tweet that got retweet and favorite.

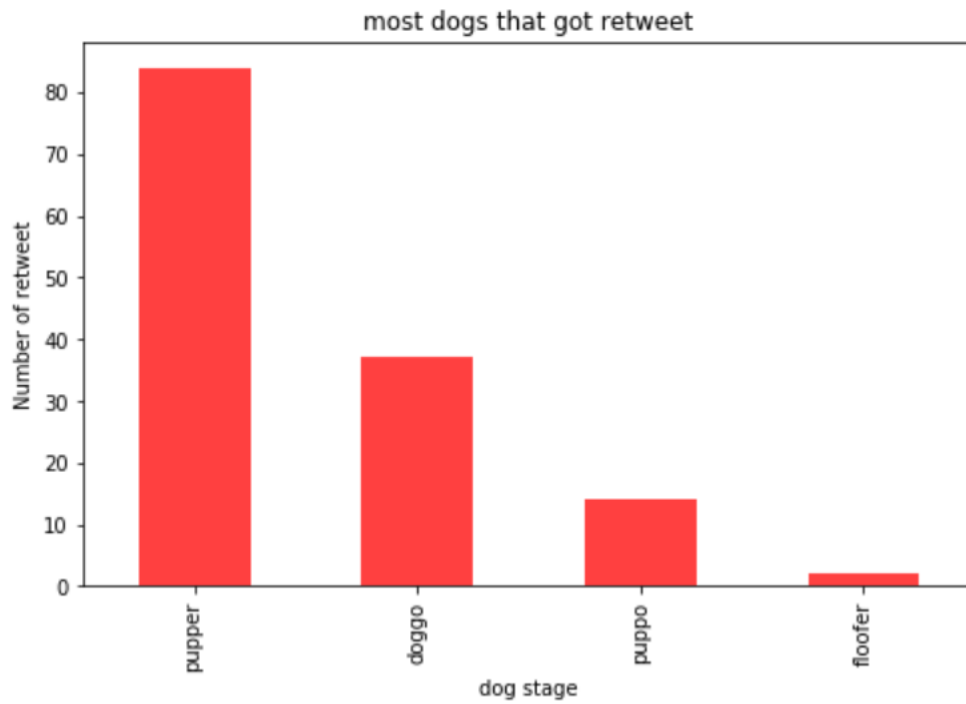

For most popular dog and dog breed I used histogram

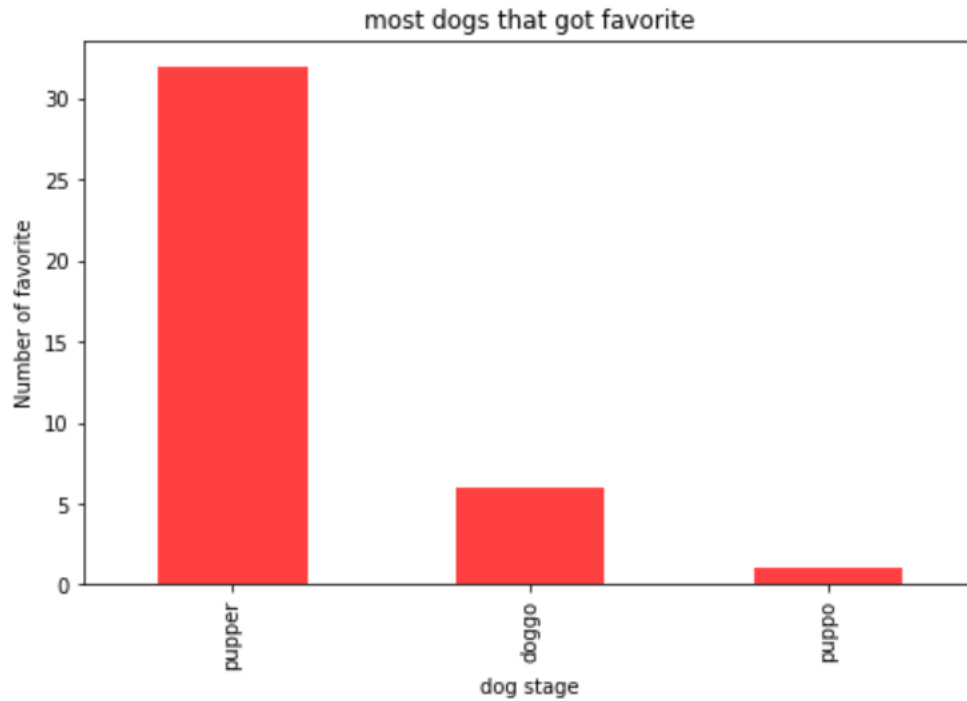

Moreover, the dog's breed state as follow:

On the other hand, the most dogs that got retweet is state as the flowing histogram:

And the favorite state as the following:

Concluding

The result I end up state as the following, Pupper is the most dog stage and also got more retweet and favorite. However, golden retriever is the most dog breed with more than 140.
